About the Program

Welcome to Nyeras – your passport to AIML expertise!

At Nyeras, we're on a mission to equip you with the skills needed to thrive in the ever-evolving world of AIML. Our courses are crafted by industry experts who know the ins and outs of digital defense.

Get ready for hands-on learning that brings AIML to life. Whether you're a newbie or a seasoned pro, our flexible learning options fit your schedule and style.

Join us and become a Tech guardian. Let's secure the digital frontier together!

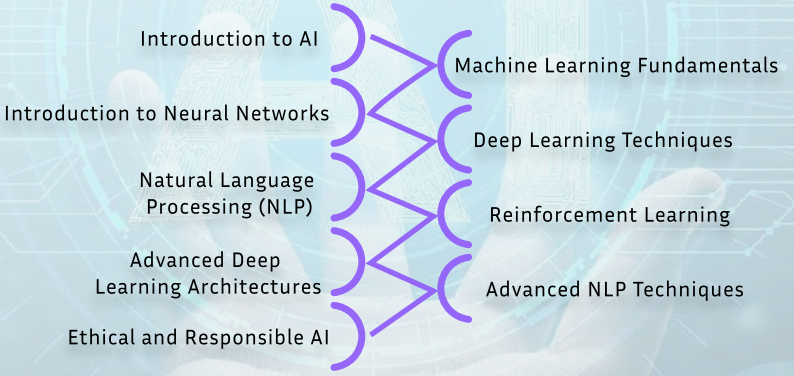

Nyeras Instituitions nyeras_app www.nyeras.com

key Features

- Exclusive Access to LMS Portal
- Live Interactive Classes
- 7+ Years Industrial Expert Trainers
- Dedicated Course Materials
- 2 - Realtime Projects with Internship
- Mentorship till Placement

The Roadmap

Nyeras Instituitions nyeras_app www.nyeras.com

Course Curriculum

1 Introduction to AI

- Definition and history of AI
- Overview of AI subfields and applications
- considerations in AI

2 Machine Learning Fundamentals

- Basics of supervised and unsupervised learning
- Feature engineering and data preprocessing
- Model evaluation and validation

Course Curriculum

3 Introduction to Neural Networks

- Understanding artificial neural networks
- Activation functions and feedforward propagation
- Introduction to backpropagation

4 Deep Learning Techniques

- Convolutional Neural Networks (CNNs) for computer vision
- Recurrent Neural Networks (RNNs) for sequence data
- Transfer learning and fine-tuning

Course Curriculum

5 Natural Language Processing (NLP)

- Text preprocessing and tokenization
- Sentiment analysis and text classification
- Named Entity Recognition (NER) and language generation

6 Reinforcement Learning

- Markov decision processes and Q learning
- Policy gradients and actor-critic methods
- Applications in robotics and game playing

Course Curriculum

7 Advanced Deep Learning Architectures

- Generative Adversarial Networks (GANs) for image synthesis
- Transformer models for NLP tasks
- Variational Autoencoders (VAEs) for generative modeling

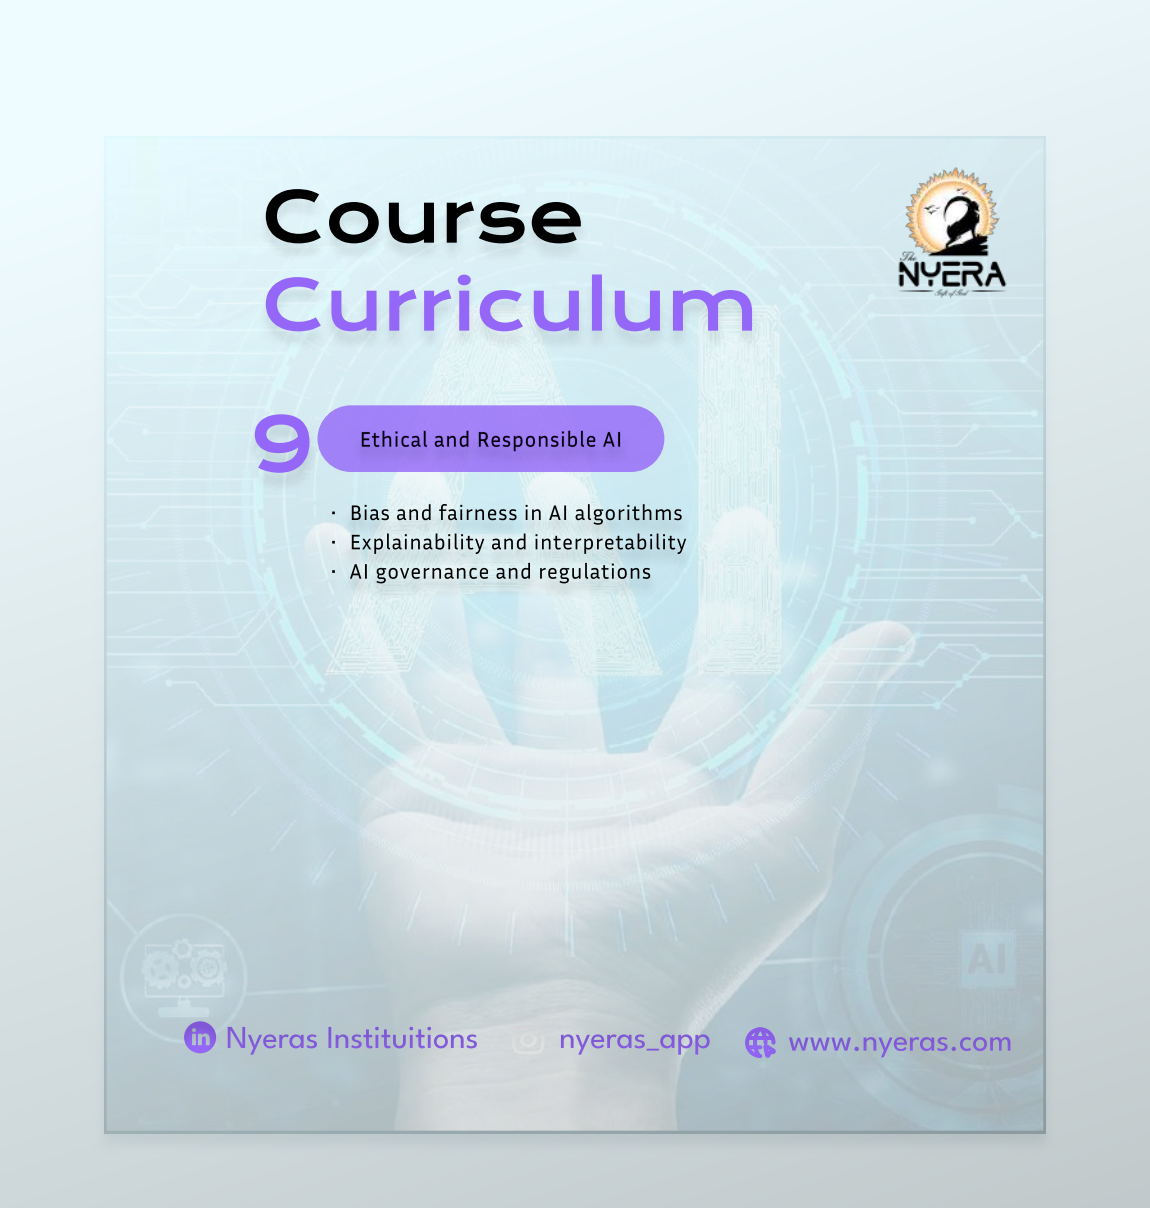

8 Advanced NLP Techniques

- Attention mechanisms and self attention
- Language translation and summarization
- BERT and other contextual embeddings

Course Curriculum

9 Ethical and Responsible AI

- Bias and fairness in AI algorithms
- Explainability and interpretability
- AI governance and regulations
